

Introducing “Yunika Vision,” **Japan’s Largest Outdoor Screen** **Japan’s first** triple-screen HD outdoor display offers stunning images and real-time information

YUNIKA VISION

Powers up on Friday, April 16, 2010 with the grand opening of the Yamada Denki LABI Shinjuku Higashiguchi Store

TOKYO, April 2, 2010 — Yunika Corporation announced today that Yunika Vision, the largest outdoor screen in Japan, will be featured on the front of the newly completed Yunika Building, a new landmark in the Shinjuku district of Tokyo, Japan. The building is located at 3-23-7 Shinjuku, Shinjuku-ku.

Yunika Vision will officially power up on April 16, 2010, the same day that the main tenant of the Yunika Building, the Yamada Denki LABI Shinjuku Higashiguchi Store, opens its doors to the public.

Yunika Vision comprises three high-definition screens, each measuring approximately 100 square meters. It will showcase a variety of content ranging from commercials to original productions. The triple-screen system offers various display options, making it possible to show commercials in new ways. Yunika Vision also features a digital signage system to incorporate real-time visual information. The system enables Yunika Vision to provide useful information accompanied by delightful, stunning visual images, including cinema information about movies now showing at nearby theaters, and concert and event information for clubs and venues, all featured on the massive, large-screen display. Yunika Vision is a state-of-the-art media channel, Japan’s largest outdoor screen and first triple-screen display, and an excellent source of real-time information.
